[Print: PDF](#)

Certain versions of [WP Express Checkout Accept PayPal Payments Easily](#) from [Mra13](#) contain the following vulnerability:

The WP Express Checkout plugin for WordPress is vulnerable to Stored Cross-Site Scripting via the 'pec_coupon[code] parameter in versions up to, and including, 2.2.8 due to insufficient input sanitization and output escaping. This makes it possible for authenticated attackers with administrator-level access to inject arbitrary web scripts in pages that will execute whenever a user accesses an injected page. Note: This can potentially be exploited by lower-privileged users if the `Admin Dashboard Access Permission` setting is set for those users to access the dashboard.

CVE-2023-1469 has been assigned by security@wordfence.com to track the vulnerability

Affected Vendor/Software: **mra13 - WP Express Checkout (Accept PayPal Payments Easily)** version = **2.2.8**
