

# CVE-2023-1971

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                        |
|------------------------|--------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2023-1971                                                                                          |
| <b>State</b>           | PUBLIC                                                                                                 |
| <b>Assigner</b>        | cna@vuldb.com                                                                                          |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                           |
| <b>Published</b>       | 2023-04-10 17:15:00 UTC                                                                                |
| <b>Updated</b>         | 2023-11-07 04:05:00 UTC                                                                                |
| <b>Description</b>     | ** UNSUPPPORTED WHEN ASSIGNED ** ** UNSUPPORTED WHEN ASSIGNED ** A vulnerability, which was classified |

## Risk And Classification

### Problem Types: CWE-918

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor          | Product | Version | Update | Edition | Language |
|-------------|-----------------|---------|---------|--------|---------|----------|
| Application | Tpadmin Project | Tpadmin | 1.3.12  | All    | All     | All      |

## References
