

# CVE-2023-21379

Published on: Not Yet Published

Last Modified on: 10/30/2023 06:11:11 PM UTC

## CVE-2023-21379

[Source: Mitre](#)[Source: NIST](#)[CVE.ORG](#)[Print: PDF](#)

Certain versions of [Android](#) from [Google](#) contain the following vulnerability:

In Bluetooth, there is a possible out of bounds read due to a missing bounds check. This could lead to local information disclosure in the Bluetooth server with System execution privileges needed. User interaction is not needed for exploitation.

CVE-2023-21379 has been assigned by security@android.com to track the vulnerability

Affected Vendor/Software: **Google - Android** version = 14

## CVE References

| Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Tags                                                            | Link                                                                                                                                           |
