

# CVE-2023-25561

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                           |
|------------------------|---------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2023-25561                                                                                                            |
| <b>State</b>           | PUBLIC                                                                                                                    |
| <b>Assigner</b>        | security-advisories@github.com                                                                                            |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                              |
| <b>Published</b>       | 2023-02-11 01:23:00 UTC                                                                                                   |
| <b>Updated</b>         | 2023-02-21 20:19:00 UTC                                                                                                   |
| <b>Description</b>     | DataHub is an open-source metadata platform. In the event a system is using Java Authentication and Authorization Service |

## Risk And Classification

### Problem Types: CWE-755

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                          | Product                 | Version | Update | Edition | Language |
|-------------|---------------------------------|-------------------------|---------|--------|---------|----------|
| Application | <a href="#">Datahub Project</a> | <a href="#">Datahub</a> | All     | All    | All     | All      |
