CVE-2023-2639

Source: Mitre

Source: NIST

CVE.ORG

Print: PDF

Certain versions of [Factorytalk Policy Manager](#) from [Rockwellautomation](#) contain the following vulnerability:

The underlying feedback mechanism of Rockwell Automation's FactoryTalk System Services that transfers the FactoryTalk Policy Manager rules to relevant devices on the network does not verify that the origin of the communication is from a legitimate local client device. This may allow a threat actor to craft a malicious website that, when visited, will send a malicious script that can connect to the local WebSocket endpoint and wait for events as if it was a valid client device. If successfully exploited, this would allow a threat actor to receive information including whether FactoryTalk Policy Manager is installed and potentially the entire security policy.

CVE-2023-2639 has been assigned by PSIRT@rockwellautomation.com to track the vulnerability - currently rated as **MEDIUM** severity.

Affected Vendor/Software: **Rockwell Automation - FactoryTalk System Services** version = <= 6.20

CVSS3 Score: **4.7 - MEDIUM**

Attack Vector	Attack Complexity	Privileges Required	User Interaction
NETWORK	LOW	NONE	REQUIRED
Scope	Confidentiality Impact	Integrity Impact	Availability Impact
CHANGED	LOW	NONE	NONE
