

# CVE-2023-2954

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                   |
|------------------------|---------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2023-2954                                                                                     |
| <b>State</b>           | PUBLIC                                                                                            |
| <b>Assigner</b>        | security@huntr.dev                                                                                |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                      |
| <b>Published</b>       | 2023-05-29 07:15:00 UTC                                                                           |
| <b>Updated</b>         | 2023-06-02 19:21:00 UTC                                                                           |
| <b>Description</b>     | Cross-site Scripting (XSS) - Stored in GitHub repository liangliangyy/djangoblog prior to master. |

## Risk And Classification

**Problem Types:** CWE-79

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                             | Product                    | Version | Update | Edition | Language |
|-------------|------------------------------------|----------------------------|---------|--------|---------|----------|
| Application | <a href="#">Djangoblog Project</a> | <a href="#">Djangoblog</a> | All     | All    | All     | All      |
