

# CVE-2023-30513

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                            |
|------------------------|----------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2023-30513                                                                                                             |
| <b>State</b>           | PUBLIC                                                                                                                     |
| <b>Assigner</b>        | jenkinsci-cert@googlegroups.com                                                                                            |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                               |
| <b>Published</b>       | 2023-04-12 18:15:00 UTC                                                                                                    |
| <b>Updated</b>         | 2023-04-21 16:47:00 UTC                                                                                                    |
| <b>Description</b>     | Jenkins Kubernetes Plugin 3909.v1f2c633e8590 and earlier does not properly mask (i.e., replace with asterisks) credentials |

## Risk And Classification

### Problem Types: CWE-319

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor  | Product    | Version | Update | Edition | Language |
|-------------|---------|------------|---------|--------|---------|----------|
| Application | Jenkins | Kubernetes | All     | All    | All     | All      |
