

# CVE-2023-35683

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                               |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2023-35683                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                        |
| <b>Assigner</b>        | security@android.com                                                                                                          |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                  |
| <b>Published</b>       | 2023-09-11 21:15:00 UTC                                                                                                       |
| <b>Updated</b>         | 2023-09-14 02:00:00 UTC                                                                                                       |
| <b>Description</b>     | In bindSelection of DatabaseUtils.java, there is a possible way to access files from other applications due to SQL injection. |

## Risk And Classification

### Problem Types: CWE-89

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                 | Product                 | Version | Update | Edition | Language |
|------------------|------------------------|-------------------------|---------|--------|---------|----------|
| Operating System | <a href="#">Google</a> | <a href="#">Android</a> | 11.0    | All    | All     | All      |
| Operating System | <a href="#">Google</a> | <a href="#">Android</a> | 12.0    | All    | All     | All      |
| Operating System | <a href="#">Google</a> | <a href="#">Android</a> | 12.1    | All    | All     | All      |
| Operating System | <a href="#">Google</a> | <a href="#">Android</a> | 13.0    | All    | All     | All      |
