

# CVE-2023-35987

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                |
|------------------------|--------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2023-35987                                                                 |
| <b>State</b>           | PUBLIC                                                                         |
| <b>Assigner</b>        | ics-cert@hq.dhs.gov                                                            |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                   |
| <b>Published</b>       | 2023-07-06 23:15:00 UTC                                                        |
| <b>Updated</b>         | 2023-07-14 14:42:00 UTC                                                        |
| <b>Description</b>     | PiiGAB M-Bus contains hard-coded credentials which it uses for authentication. |

## Risk And Classification

**Problem Types:** CWE-798

## NVD Known Affected Configurations (CPE 2.3)

| Type             | Vendor                 | Product                             | Version | Update | Edition | Language |
|------------------|------------------------|-------------------------------------|---------|--------|---------|----------|
| Hardware         | <a href="#">Piigab</a> | <a href="#">M-bus 900s</a>          | -       | All    | All     | All      |
| Operating System | <a href="#">Piigab</a> | <a href="#">M-bus 900s Firmware</a> | -       | All    | All     | All      |
