

# CVE-2023-43500

[MITRE](#)[NVD](#)[CVE.ORG](#)[JSON API](#)[Print: PDF](#)

## Summary

|                        |                                                                                                                               |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| <b>CVE</b>             | CVE-2023-43500                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                        |
| <b>Assigner</b>        | jenkinsci-cert@googlegroups.com                                                                                               |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                  |
| <b>Published</b>       | 2023-09-20 17:15:00 UTC                                                                                                       |
| <b>Updated</b>         | 2023-09-22 18:38:00 UTC                                                                                                       |
| <b>Description</b>     | A cross-site request forgery (CSRF) vulnerability in Jenkins Build Failure Analyzer Plugin 2.4.1 and earlier allows attackers |

## Risk And Classification

### Problem Types: CWE-352

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor  | Product                | Version | Update | Edition | Language |
|-------------|---------|------------------------|---------|--------|---------|----------|
| Application | Jenkins | Build Failure Analyzer | All     | All    | All     | All      |
