| <b>CVE</b>             | CVE-2023-45374                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>State</b>           | PUBLIC                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Assigner</b>        | cve@mitre.org                                                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Source Priority</b> | CVE Program / NVD first with legacy fallback                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Published</b>       | 2023-10-09 06:15:00 UTC                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>Updated</b>         | 2023-10-12 16:06:00 UTC                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>Description</b>     | An issue was discovered in the SportsTeams extension for MediaWiki before 1.35.12, 1.36.x through 1.39.x before 1.39.5, and 1.40.x before 1.40.0. The issue is a denial of service (DoS) vulnerability that can be exploited by sending a request to the SportsTeams extension that contains a large number of spaces. This causes the extension to consume excessive memory and eventually crash the server. |

## Risk And Classification

**Problem Types:** NVD-CWE-noinfo

## NVD Known Affected Configurations (CPE 2.3)

| Type        | Vendor                    | Product                   | Version | Update | Edition | Language |
|-------------|---------------------------|---------------------------|---------|--------|---------|----------|
| Application | <a href="#">Mediawiki</a> | <a href="#">Mediawiki</a> | All     | All    | All     | All      |
| Application | <a href="#">Mediawiki</a> | <a href="#">Mediawiki</a> | 1.40.0  | -      | All     | All      |
