Last Modified on: 10/31/2023 12:58:00 PM UTC

CVE-2023-5438

[Source: Mitre](#)[Source: NIST](#)[CVE.ORG](#)[Print: PDF](#)

Certain versions of [Wp Image Slideshow](#) from [Gopius](#) contain the following vulnerability:

The wp image slideshow plugin for WordPress is vulnerable to SQL Injection via the plugin's shortcode in versions up to, and including, 12.0 due to insufficient escaping on the user supplied parameter and lack of sufficient preparation on the existing SQL query. This makes it possible for authenticated attackers with subscriber-level and above permissions to append additional SQL queries into already existing queries that can be used to extract sensitive information from the database.

CVE-2023-5438 has been assigned by security@wordfence.com to track the vulnerability

Affected Vendor/Software: **gopius - wp image slideshow** version <= 12.0
