Additional Advisory Data

Workarounds

CNA: It is recommended that customers immediately convert to the in-servicing module, Unity Scheduler, and uninstall the Workflow Timer Service (Hyland.Core.Workflow.NTService.exe). Starting with OnBase 16, Unity Scheduler is the recommended replacement. It is recommended customers using versions prior to 16 upgrade to an in-servicing release of OnBase and leverage Unity Scheduler.

There are currently no legacy QID mappings associated with this CVE.
