Additional Advisory Data

Solutions

CNA: Upgrade to versions 18.9.7, 18.10.6, 18.11.3 or above. Additionally, review the Jira API token used in your integration and ensure it is scoped to only the Jira projects you intend to expose. The project keys field in the integration configuration filters the displayed issues but does not restrict the token's access. To limit which issues can be read through the integration, generate the API token from a Jira account with access only to the desired projects.
